

NEW STUDENT PANEL IN 5 SIMPLE STEPS

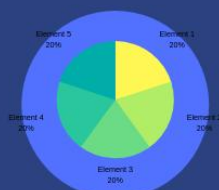

1. RESPONSIVENESS AND NEW DESIGN

What is most visible at first glance, is that the Panel's appearance is completely new. We relied first of all on a modern look and transparency. We try to update our Platform on an ongoing basis, to make it as intuitive in use as possible. The interface of the page is as responsive as possible (matched to the size of the device on which it is viewed, e.g. phone, tablet), which – and we make it clear – is another step towards a mobile application

2. AVATAR

A previously missing element in Student's Panel was the option to add an avatar or own profile photo. It suffices to click on the full name in the Panel's left top corner. The option will be displayed, allowing us to choose one of the available avatars or to add any photo.

3. MARKS

From now on, we have the possibility to check statistics, i.e. how our grade compares to the average value for the group and grades of other participants. Below, you can also see time axes, which we can use to check how our result and grades, as well as a number of received grades, change with time.

4. ATTENDANCE

The changes introduced in the "Attendance" tab consist of the breakdown of information into particular courses. Now, upon clicking on that tab, one can see percentage bars showing attendance and statuses of participation in a given course.

5. PAYMENTS

Now, we can see at once what amount for classes has been already settled and how much altogether remains to be paid by us until the end of the course's duration. Next to the list of installments to be paid, also statuses highlighted with various colours appeared: paid, partly paid, and overdue payment. Owing to such functionality, we can see at once how much and for which invoice we have to pay first.
